

FOR BUSINESS EXECUTIVES

What each group gets

Group	What changes	How we measure it
Worksite employees	Cited pay, benefits and leave answers in seconds; training when a rule changes	Self-service resolution 40% to 80%
Client employers	A monthly Compliance Assurance Statement; law changes applied in days, then hours	Law change to production ≤48 hours
Service teams	Prep, proposals and case summaries grounded in governed knowledge	Proposal prep time index 100 to 50
Insperity enterprise	Continuous CPEO, SOC and ESAC evidence; no client data crossover	Audit-evidence index 100 to 38; zero cross-tenant incidents

The cost of sailing without a keel

Risk	Without a keel	With the Keel
Agent sprawl	Each vendor's agents answer from their own copy of the truth	Every agent registered, identified and routed through one gateway
Definition drift	Workday, payroll, Fabric and Box each define an eligible employee differently	One canonical definition; the others are generated from it
Audit exposure	Evidence rebuilt by hand before each CPEO, SOC or ESAC review	Evidence emitted continuously, each item tied to its rule
Vendor lock-in	Knowledge trapped in one product's format	Knowledge in open standards; any adapter replaceable within a quarter
