

THE KEEL

Same wind. Forward motion.

Regulatory and market change pushes every PEO sideways.
The holonic semantic layer turns that force into progress.

WIND 50-state law changes · AI hiring laws · new platforms · new agents

COMPASS
sets heading · gates · guardrails

COPILOT

Jarvis · domain agents
M365 Copilot · automation

does the work

NORTH STAR

one governed source of truth,
reached from the company's compass mark

FORWARD MOTION
faster service you can prove

ABOVE THE WATERLINE · what people see and use

BELOW THE WATERLINE

The Keel

The holonic semantic layer.
Rarely seen by executives.
Everything above depends on it.

RESISTS DRIFT

one meaning for every term · rules authored once
and compiled everywhere · every answer traceable

L4 · Enterprise holarchy

standards, vocabularies, change governance

Mediation holon

mappings, identity & URI registry, harmonization

L2 · Domain holons

payroll, benefits, compliance, talent, HR tech, clients

Personal & agent models

role, jurisdiction, training, autonomy level

L1 · Knowledge holons: the ballast

142 rules, plan provisions, admitted records

THE SITUATION

The wind is already blowing

300K+

worksite employees
across thousands of client
companies

50+

states plus local
jurisdictions, each with its
own wage, leave and tax
rules

142

rules in the policy register
across five service
domains

4+

platforms with their own
definitions: Workday,
payroll, Microsoft 365,
Box

Every new platform and every new AI agent brings its own meaning for worker, client, plan and rule. Without a keel, that drift pushes the company sideways.
