

Illuminating the Defense Industrial Base

AI-Driven Supply Chain Intelligence and Defense Acquisition Pathways

THE ACQUISITION BOTTLENECK THREATENS STRATEGIC COMPETITION

THE THREAT

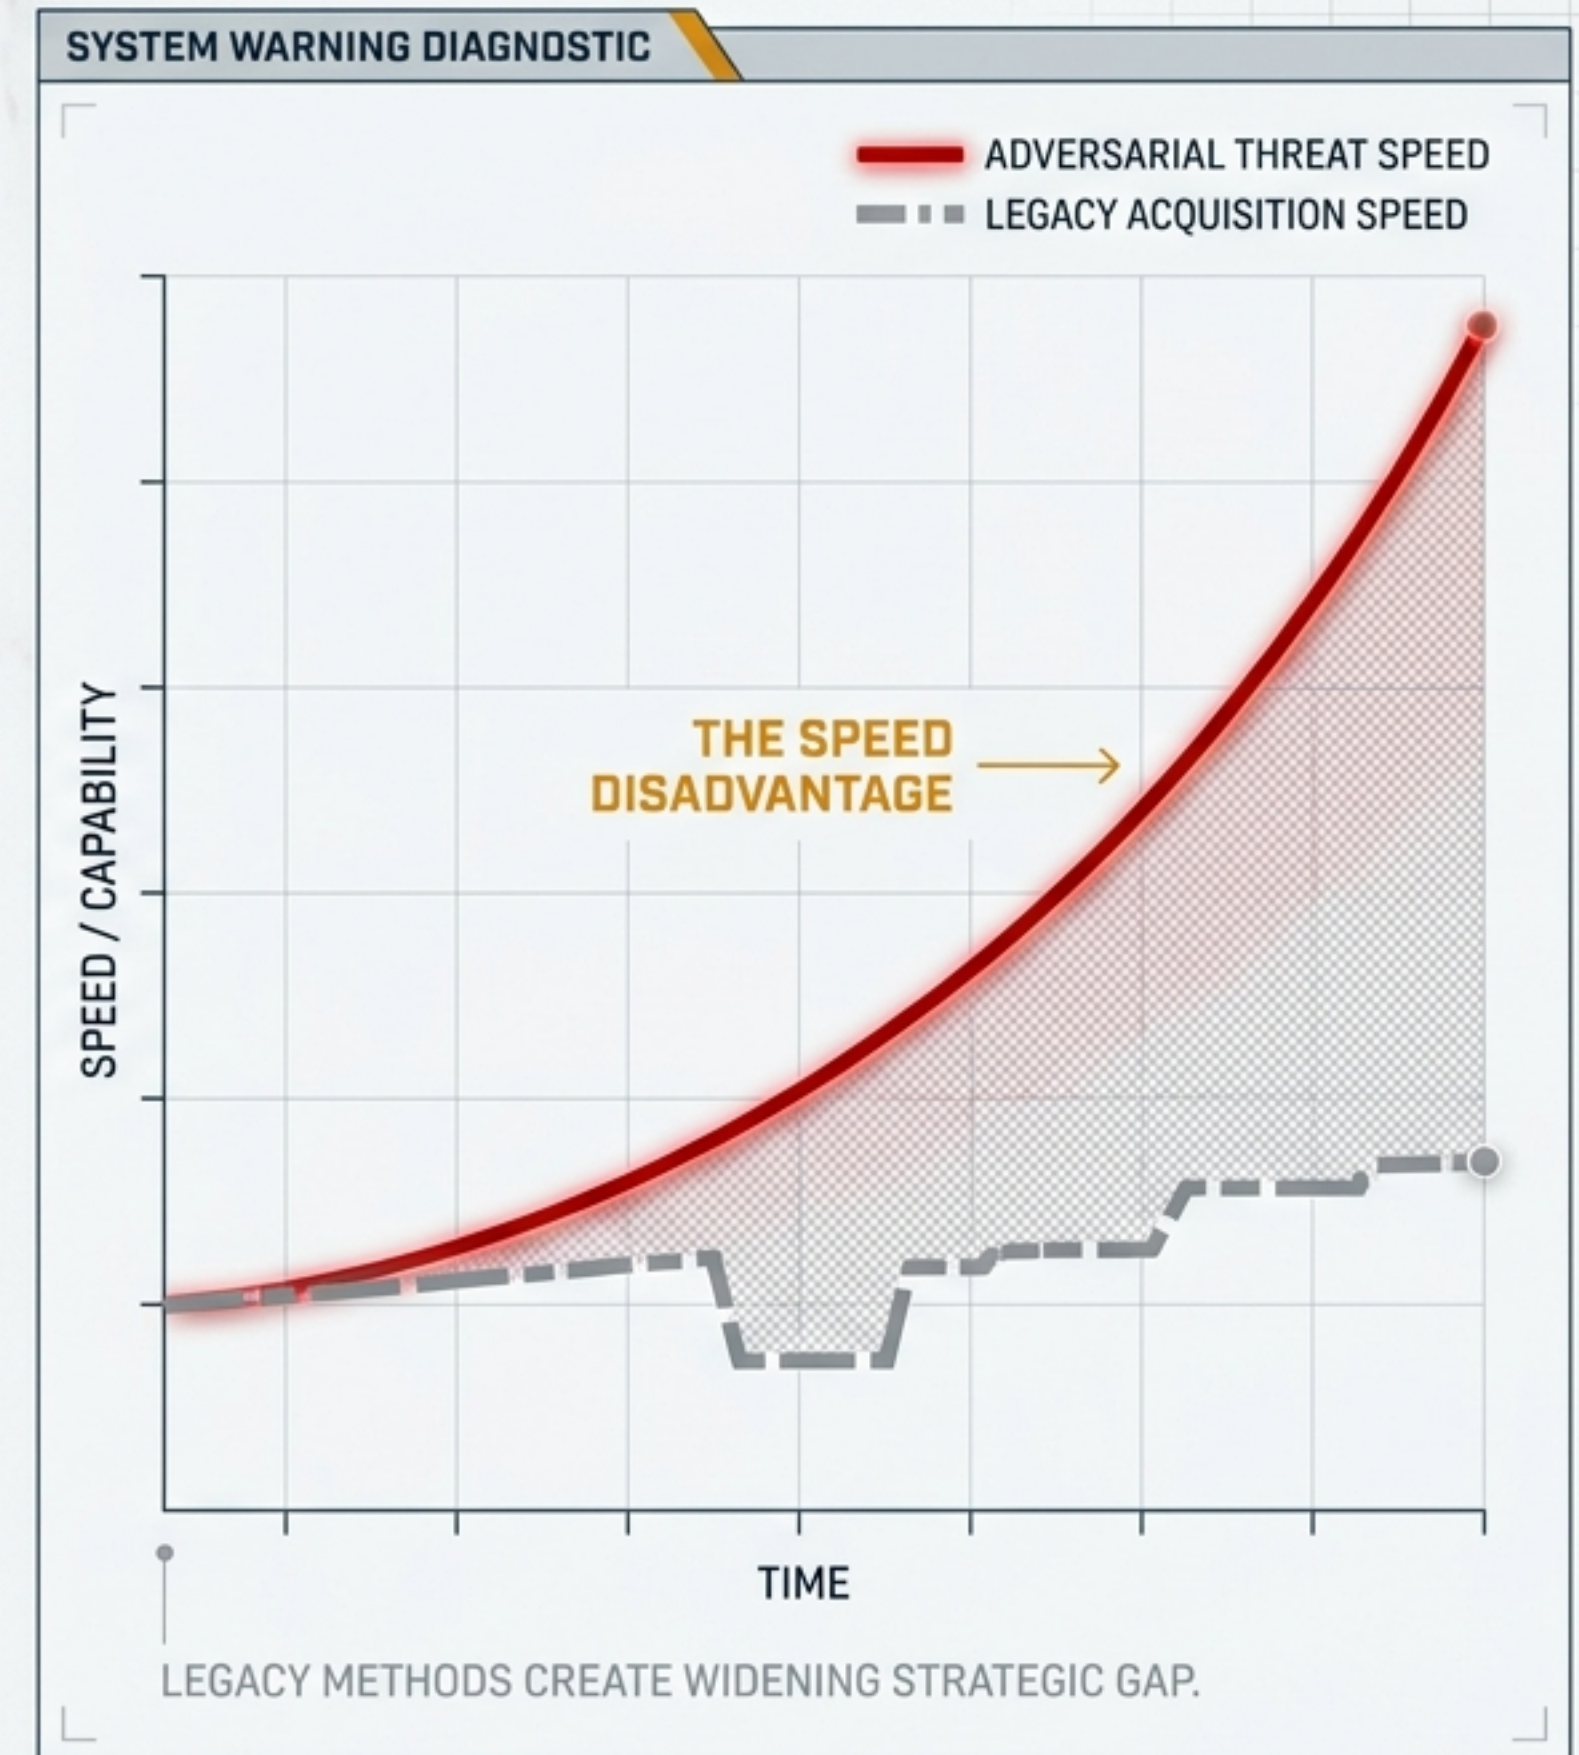

Globalized supply chains, shrinking U.S. manufacturing capacity, and adversarial economic aggression have shattered industrial base strength.

THE VULNERABILITY

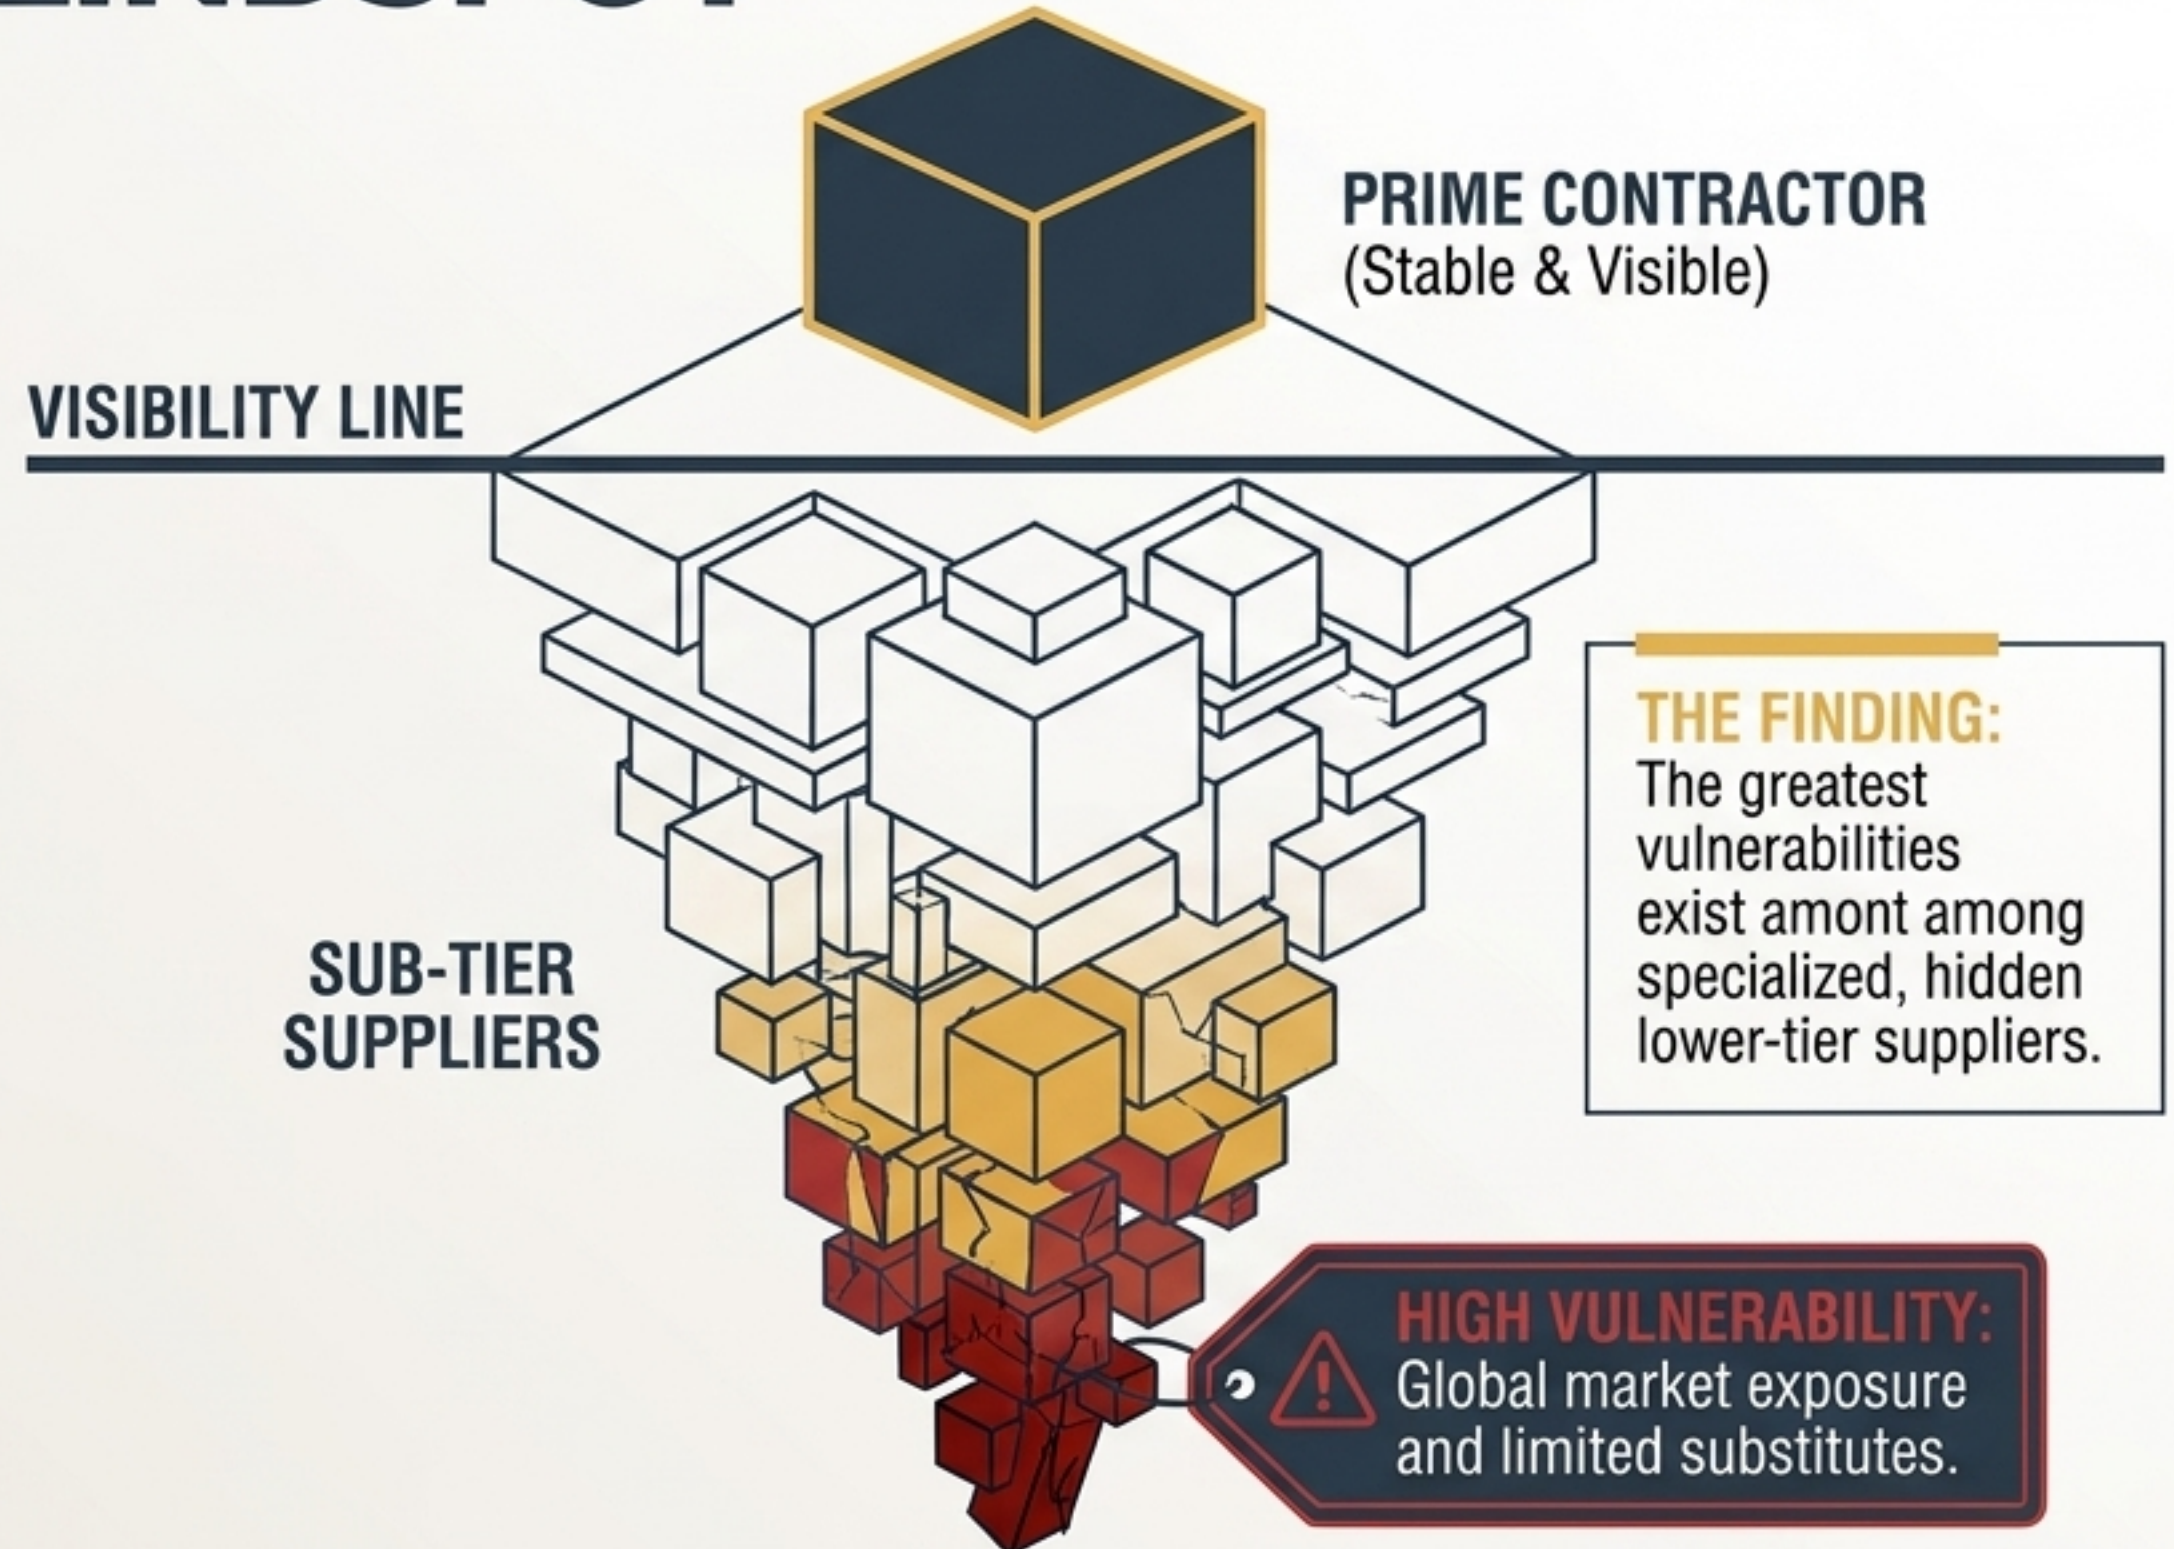

Millions in the DoD rely on manual data calls and spreadsheets to manage billions in defense platforms.

THE REALITY

It is nearly impossible to develop and field cutting-edge capabilities with the speed or scale required to stay ahead of U.S. adversaries using legacy methods.

REAL-WORLD APPLICATION: THE SUB-TIER BLINDSPOT

THE STUDY:

NPS research on Army Air-to-Ground Missile (Hellfire/JAGM) Acquisition.

THE FRAMEWORKS:

Sector-to-Sector, Tier-to-Tier (S2T2) analysis and Fragility and Criticality (FaC) assessments.

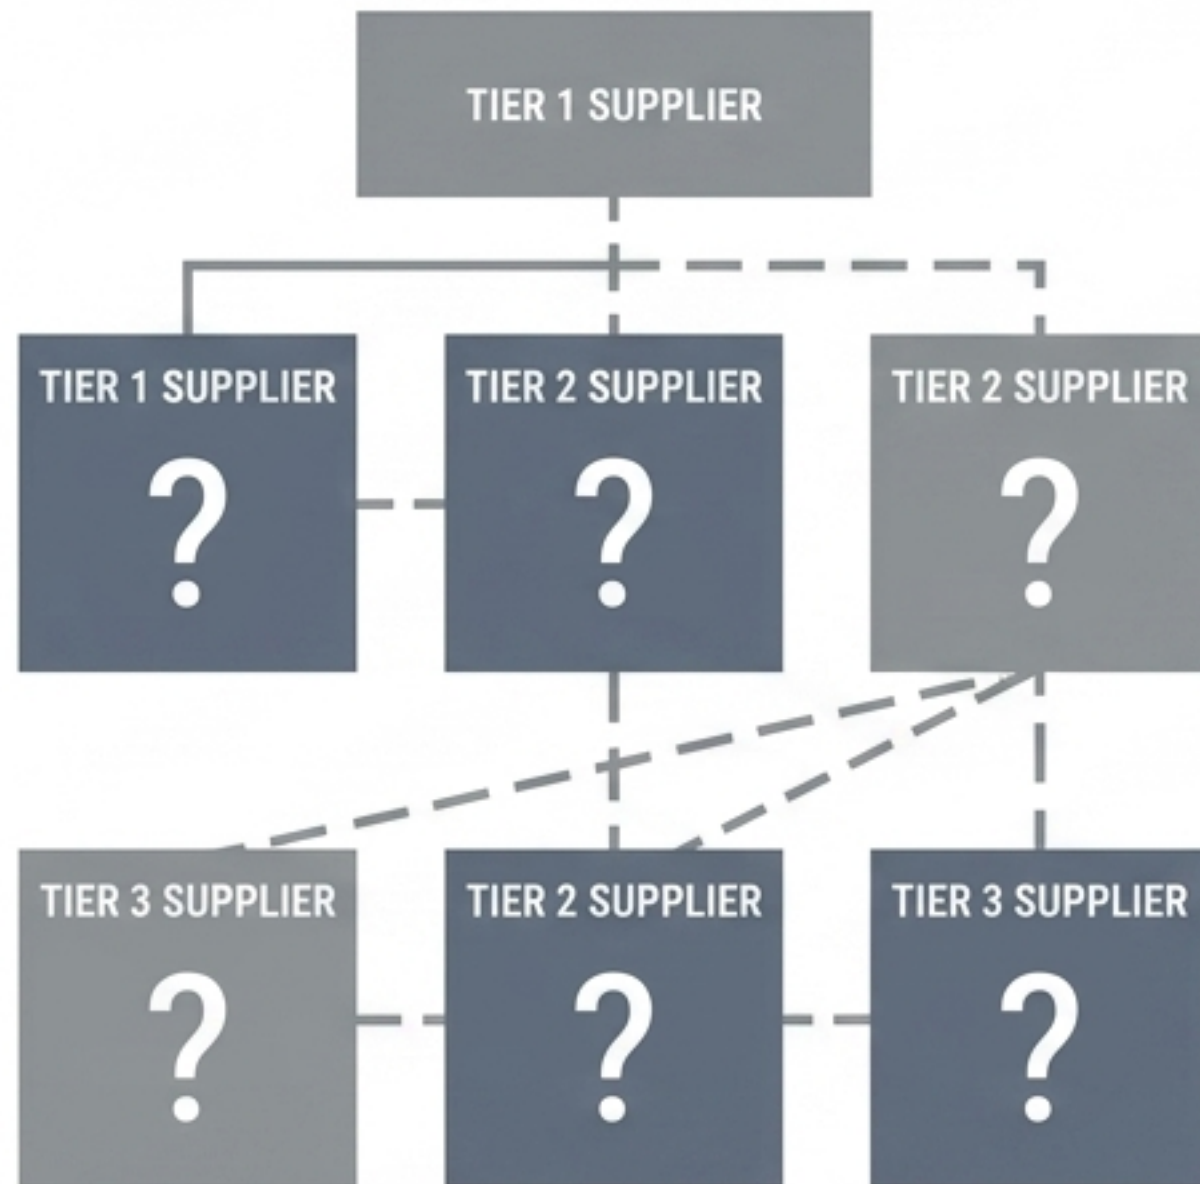

THE IMPERATIVE:

Qualitative frameworks and integrated data are required to increase visibility and inform risk mitigation at the sub-tier level.

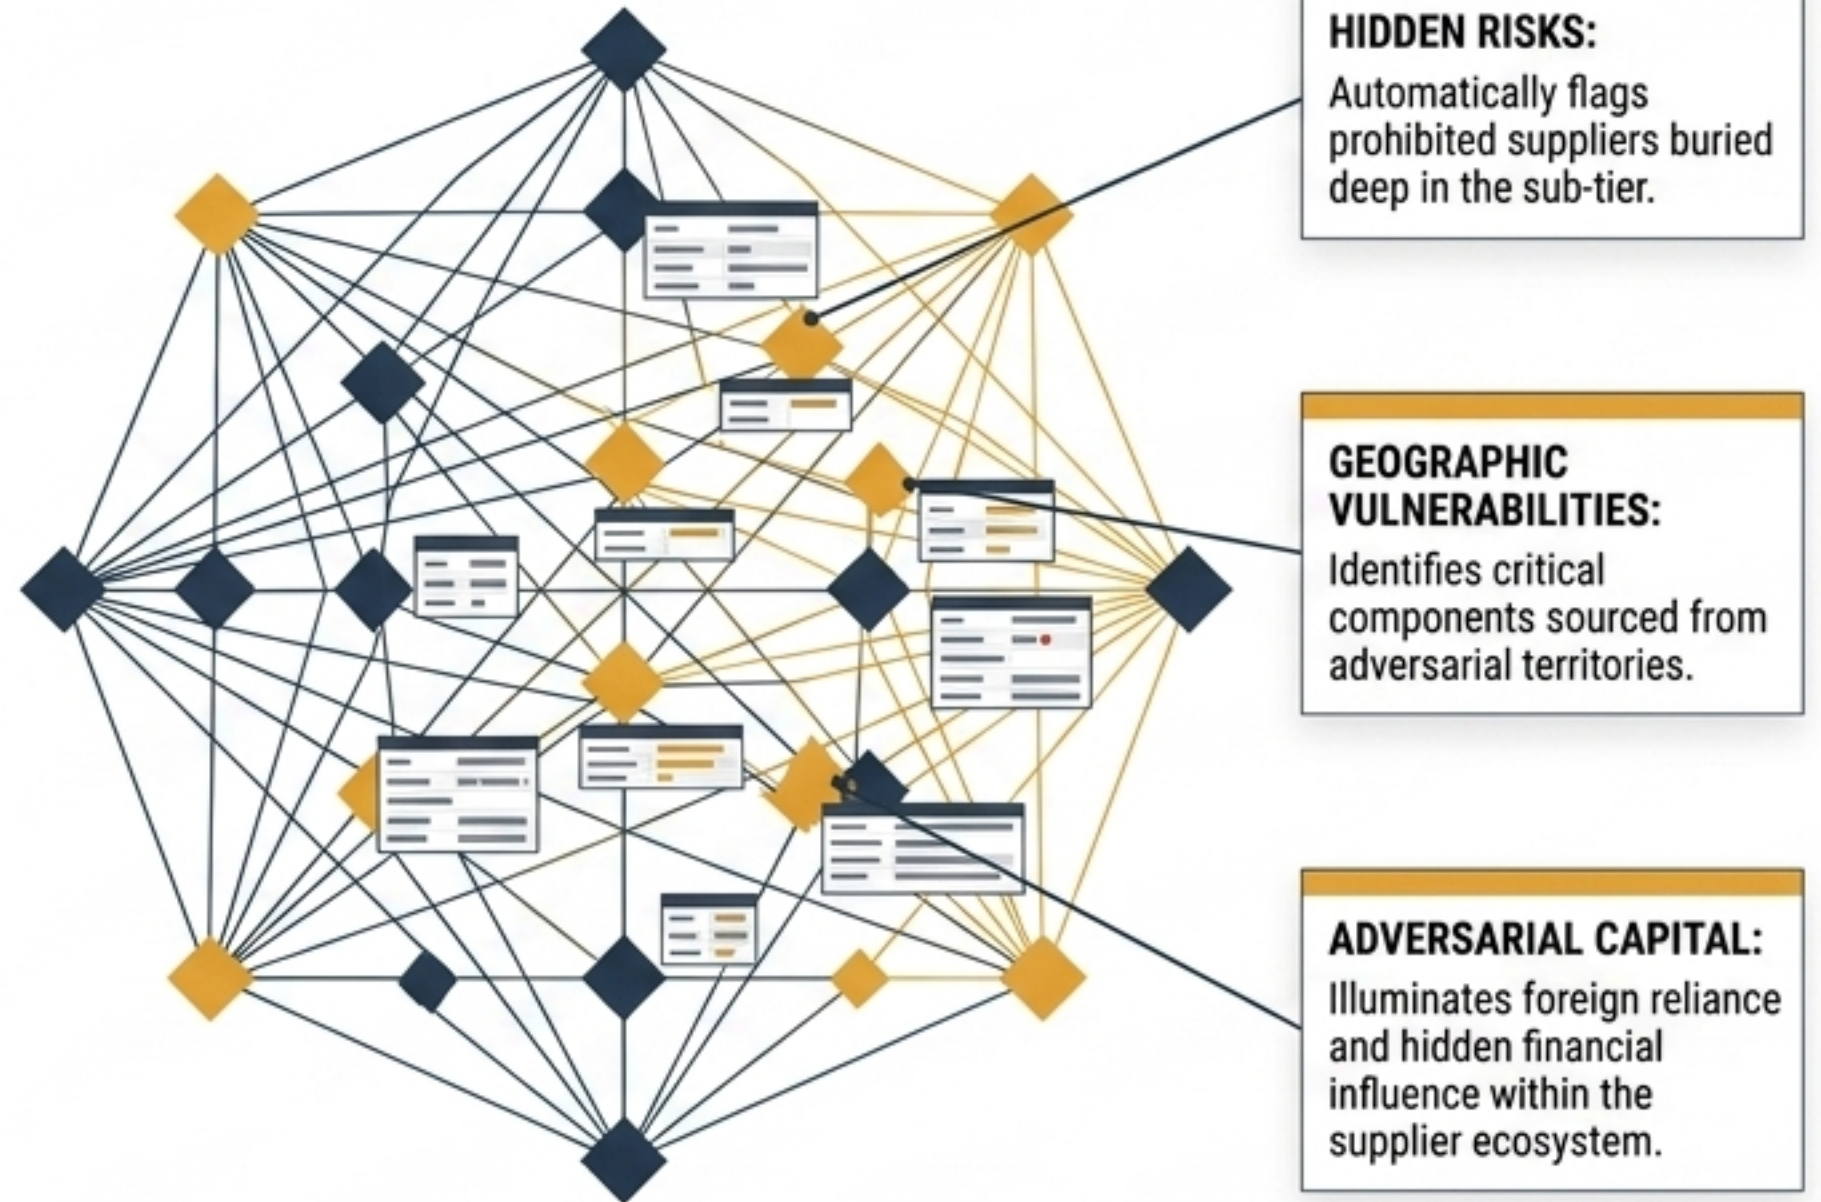

FROM OPAQUE CHAINS TO ILLUMINATED NETWORKS

Ark replaces linear assumptions with multi-tier network mapping.

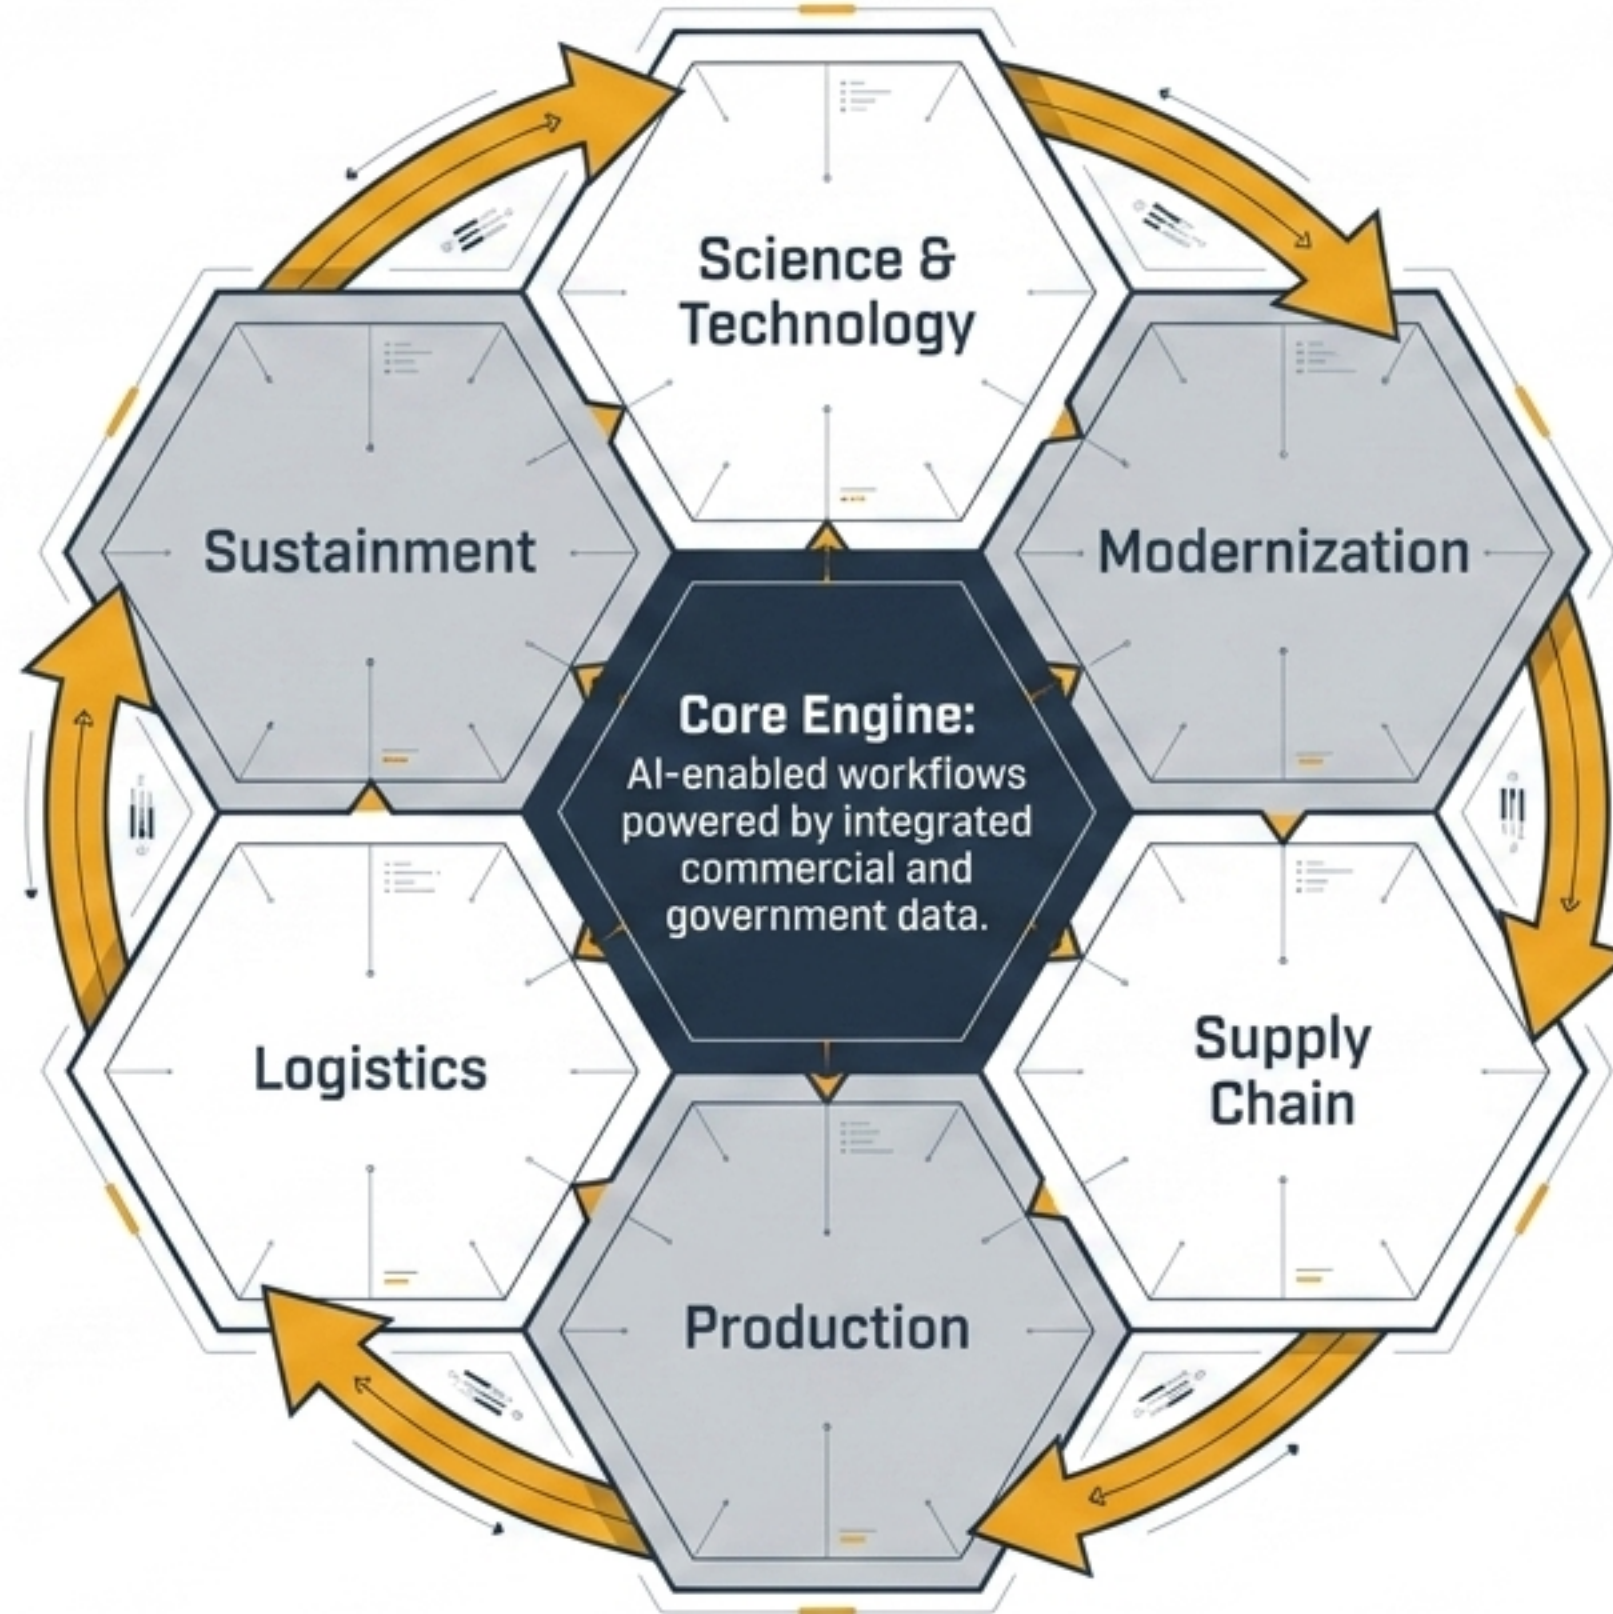

LEGACY APPROACH

THE ARK PLATFORM

The Ark Platform: Continuous Acquisition Intelligence

PURPOSE-BUILT WORKFLOWS FOR DEFENSE ACQUISITION

SUPPLY CHAIN

Find and eliminate hidden risks.
Comprehensive visibility into
supplier/sub-tier ecosystems.

SCIENCE & TECHNOLOGY

Deploy emerging tech faster.
Surface adversarial capital analysis
and venture capital trends.

PRODUCTION

Make the industrial base predictable.
Track vendor performance and
forecast part lead times.

SUSTAINMENT

Keep programs running smoothly.
Flag obsolescence risks and
analyze raw material pricing trends.

LOGISTICS

Maximize operational effectiveness.
Enhance battlefield awareness and
decision-making in contested
environments.

MODERNIZATION

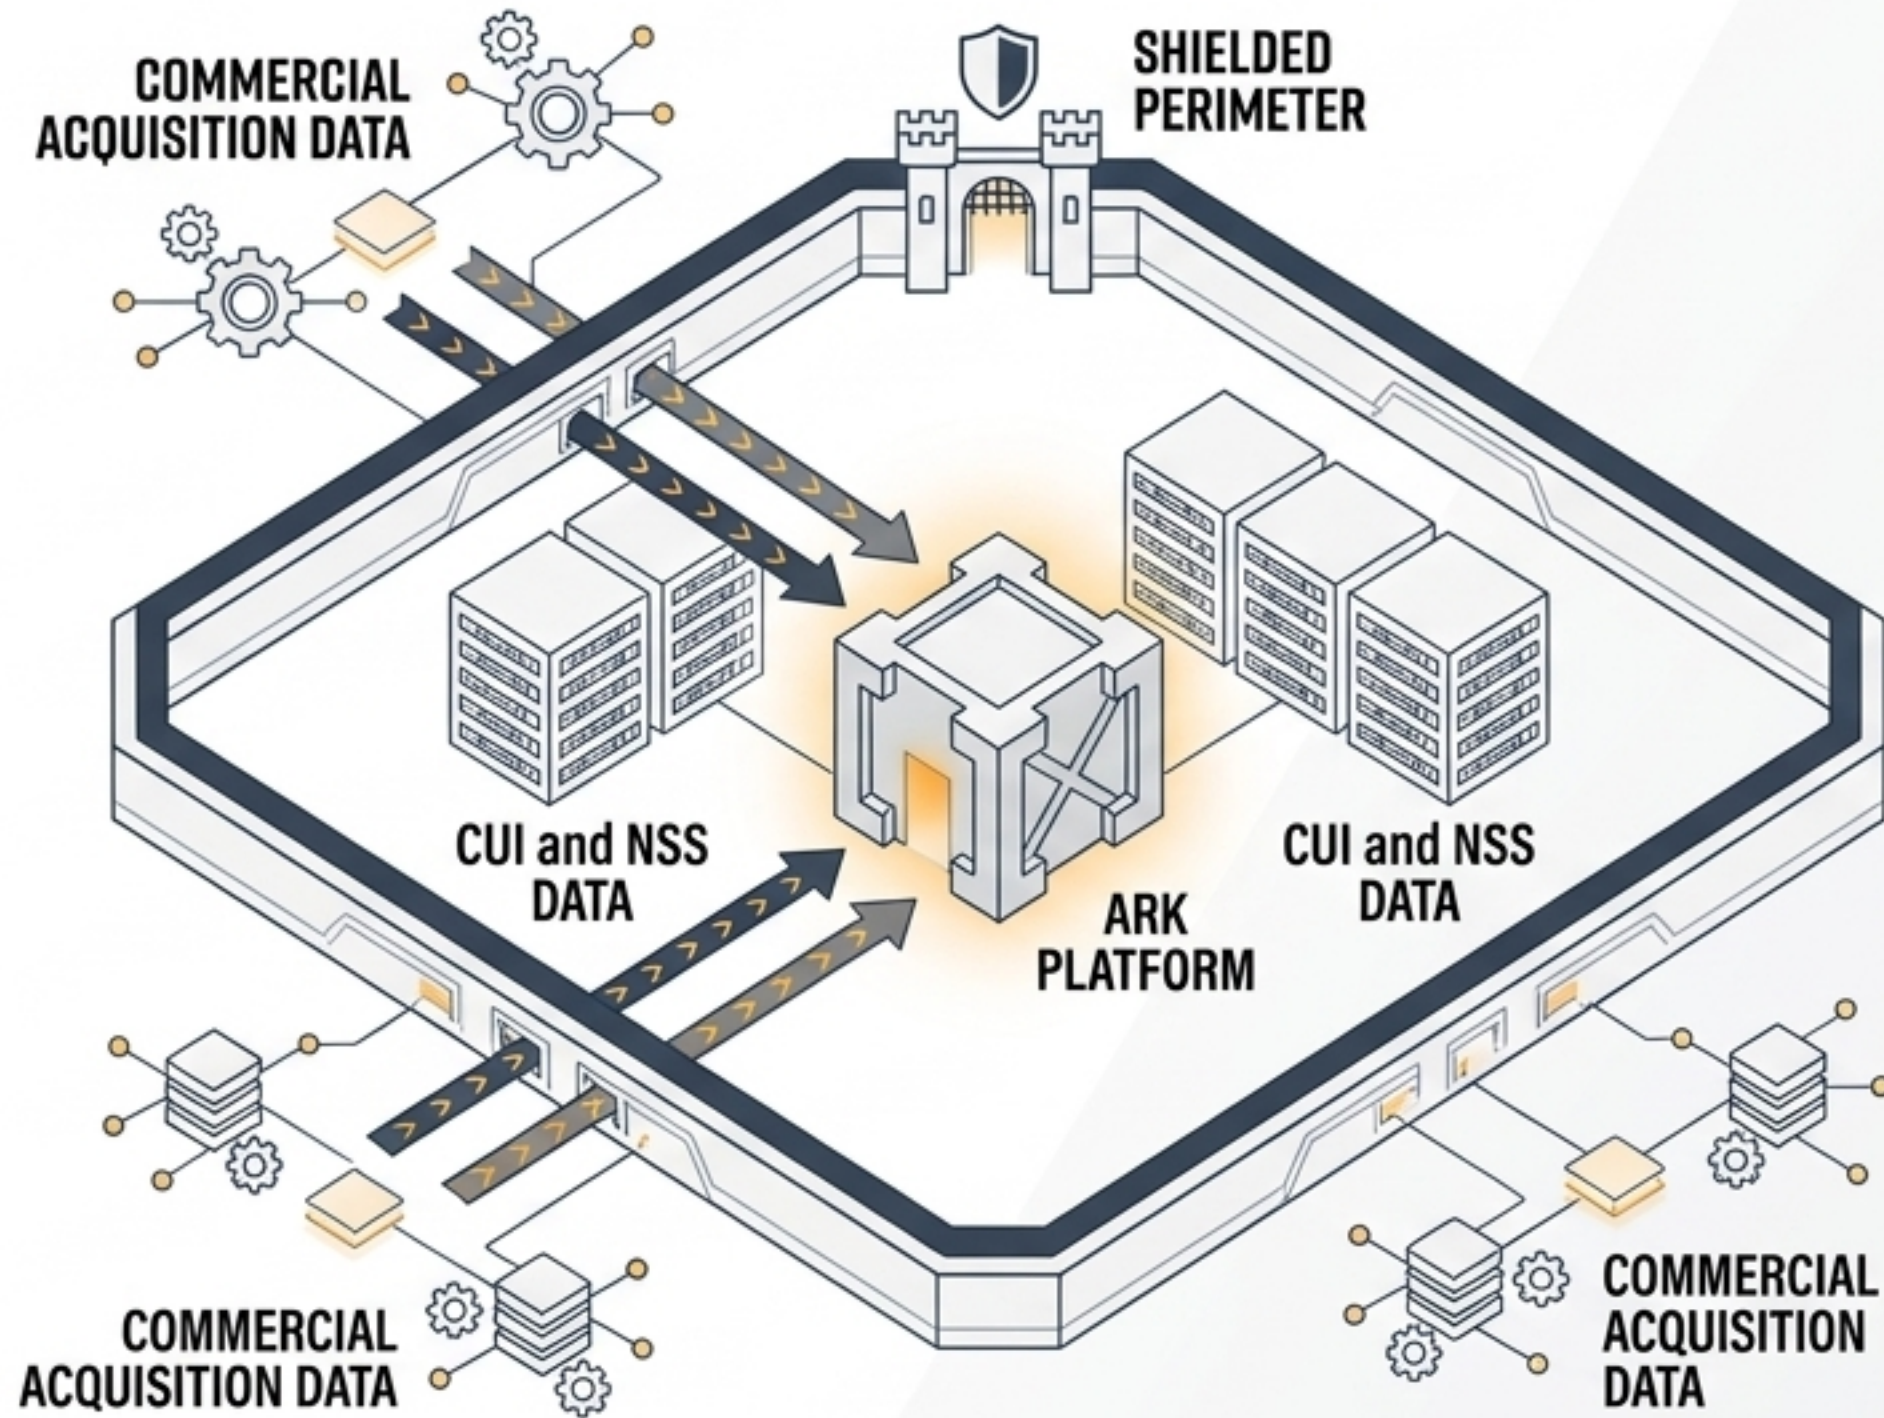

Drive readiness for future demands.
Conduct technology market analysis
and pinpoint workforce challenges.

Navigating the Defense Acquisition Landscape

Platform	AI-Driven Insights	Integrated Commercial/ Gov Data	Tailored Pathways	Mobile Access	Target Market
Govini (Ark)	✓	✓	—	—	Defense
Platform One	—	✓	—	✓	DoD
Adaptive Acquisition Framework	—	—	✓	—	Defense
Digital Acquisition Programs	✓	✓	✓	✓	Defense
Defense Acquisition Guidebook	—	—	—	—	Professionals

Key Takeaway: Ark replaces manual portfolio analysis with AI workflows, acting as the intelligence layer that powers frameworks like AAF.

MILITARY-GRADE SECURITY: THE FEDRAMP HIGH / IL5 ENVELOPE

1 FEDRAMP® HIGH AUTHORIZATION

The highest security standard available for cloud services, allowing seamless integration of the government's most sensitive unclassified data.

2 IMPACT LEVEL 5 (IL5) PROVISIONAL AUTHORIZATION

The ONLY Defense Acquisition platform with IL5 PA from DISA (sponsored by the U.S. Navy).

3 SERVICE RECIPROCITY

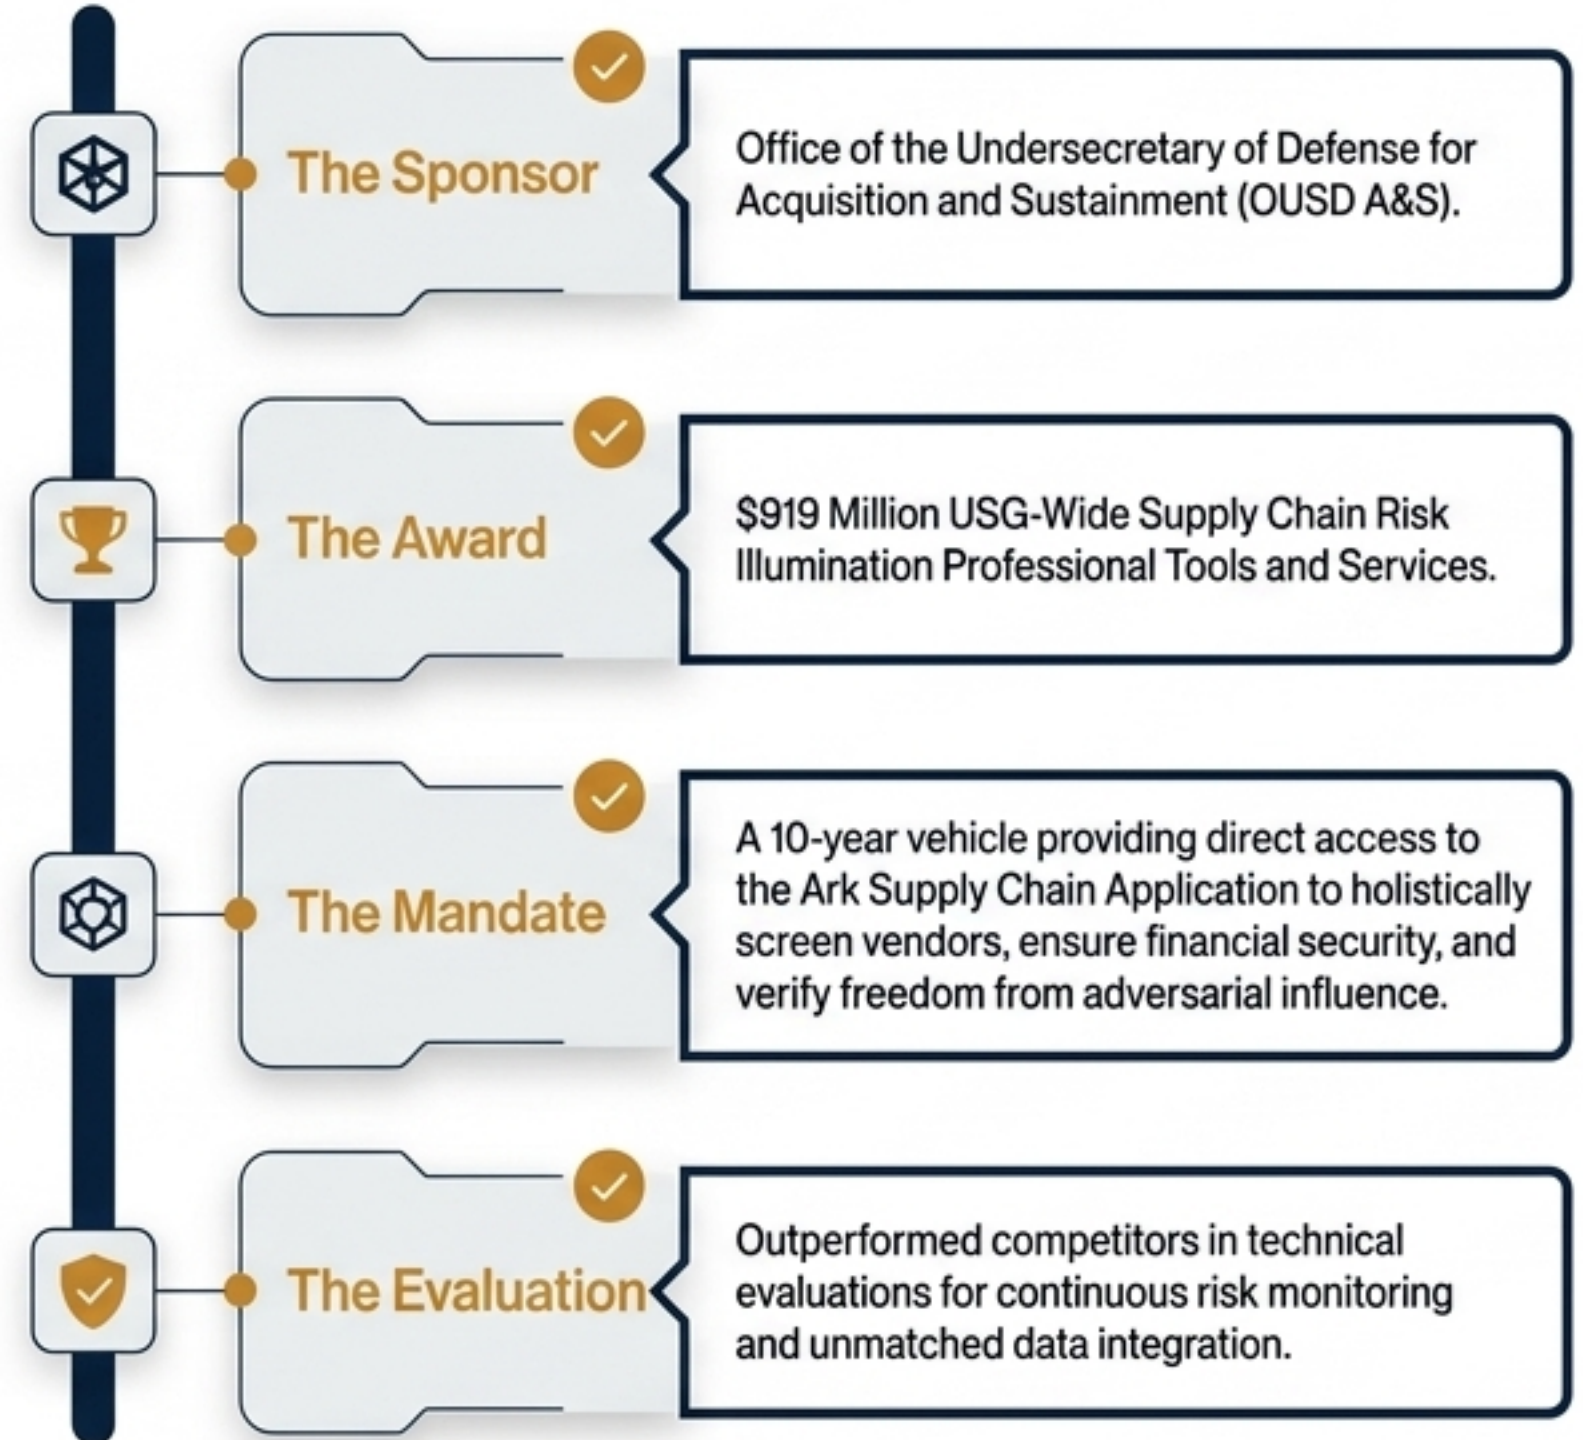

Holds multiple service-level IL5 ATOs with eligibility across all Department of War components.

Tested, Trusted, and Authorized by the DoD

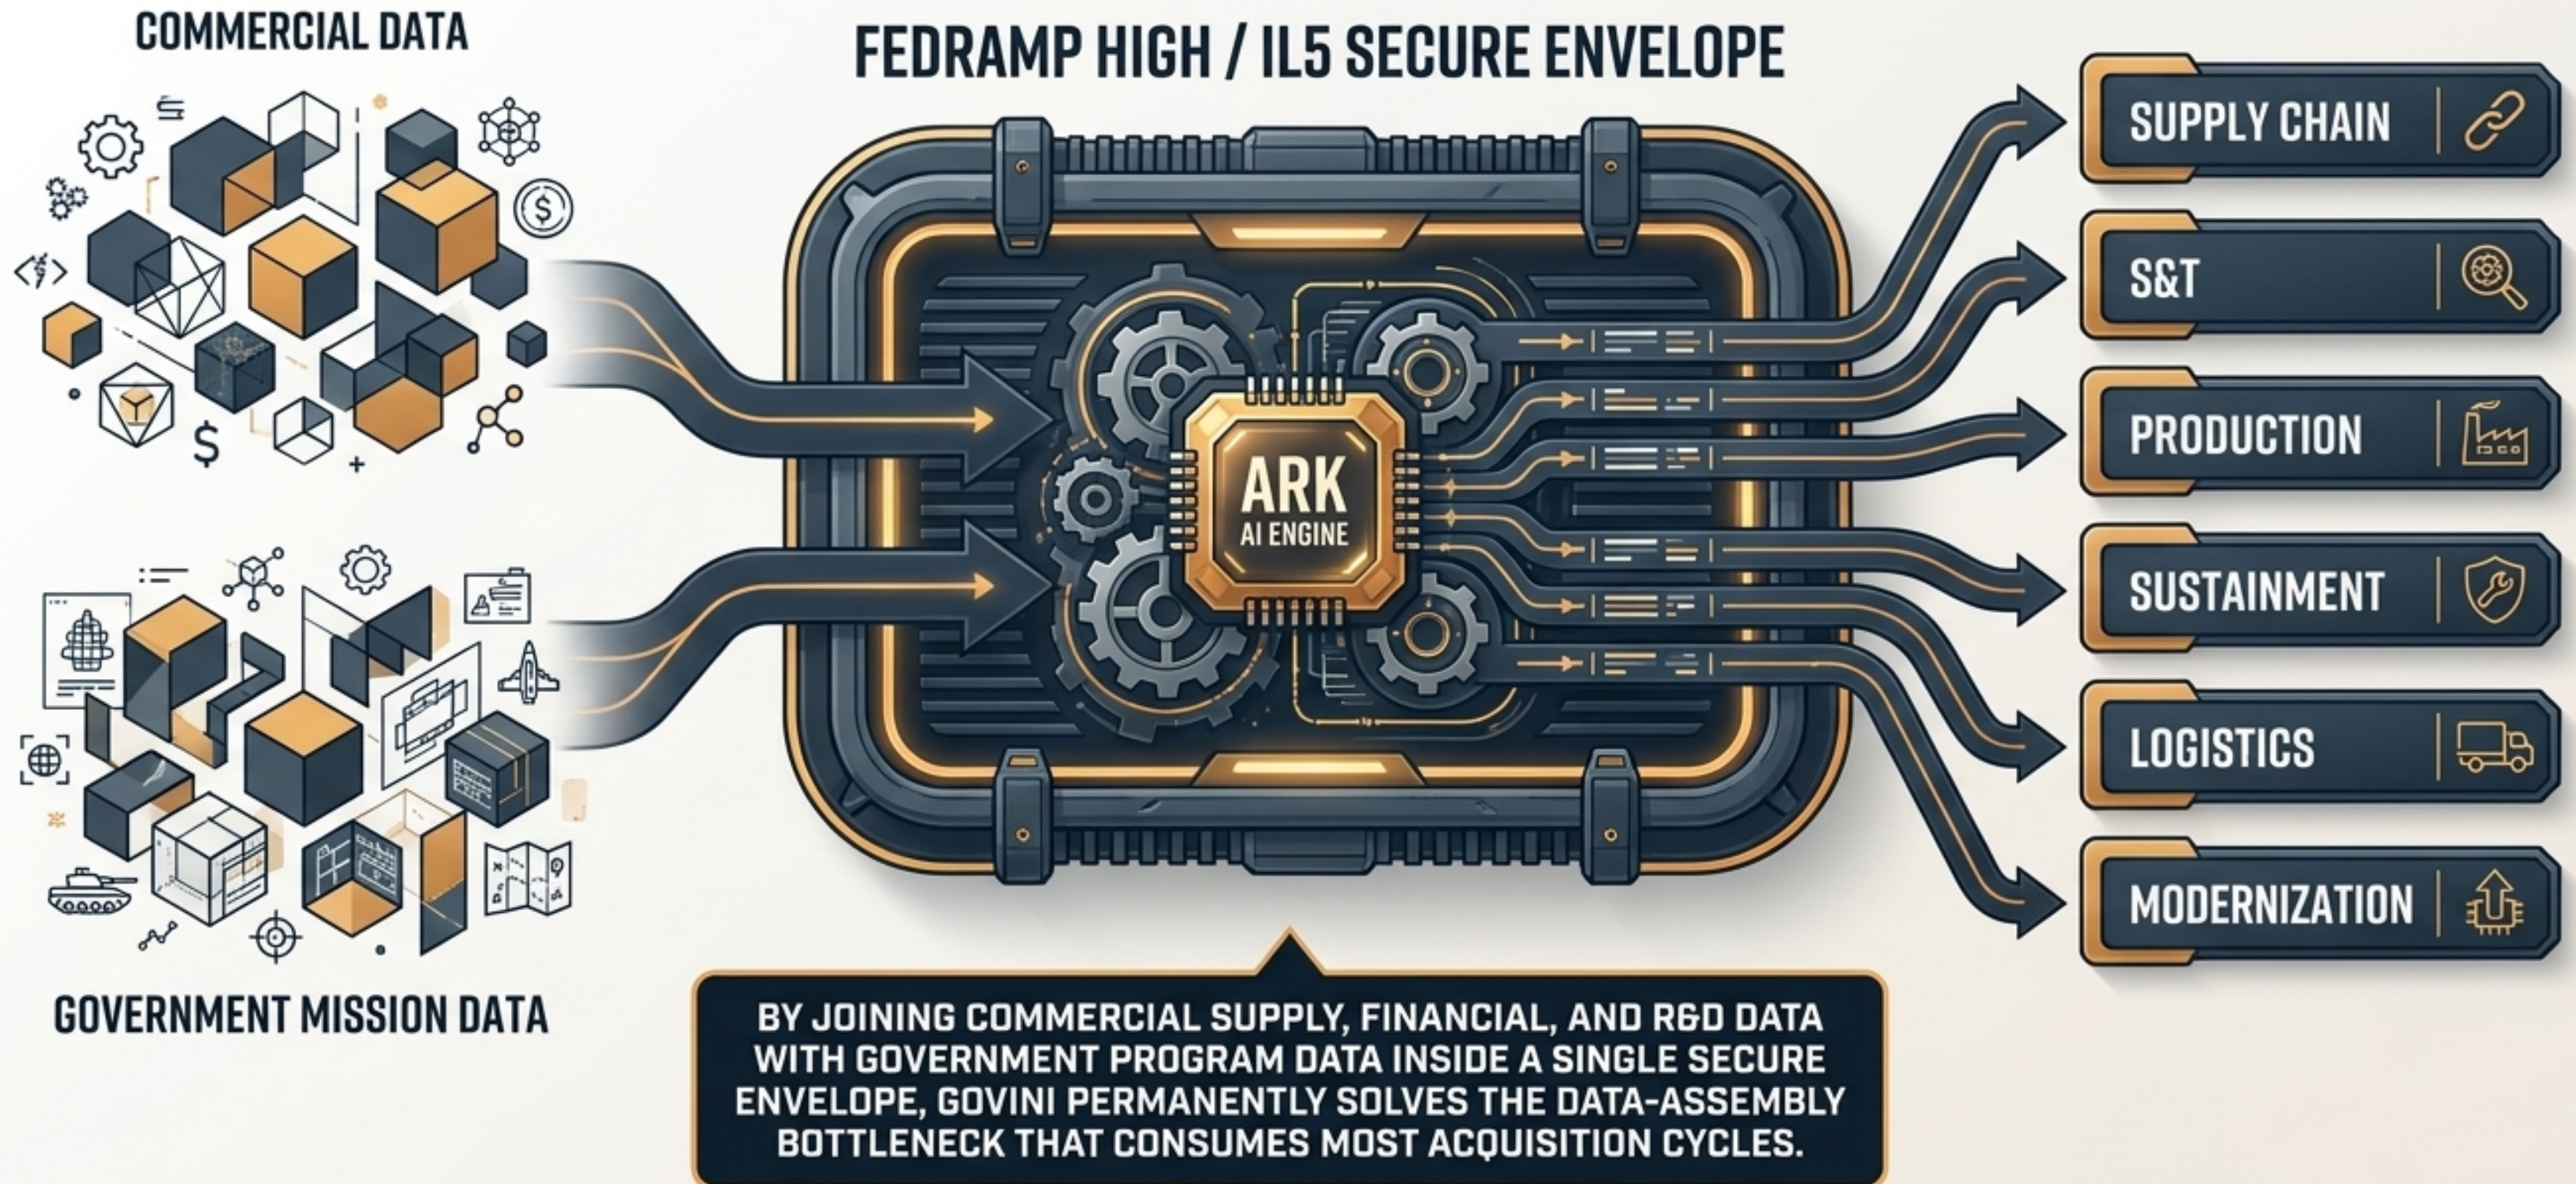

\$919M

SCRIPTS Blanket Purchase Agreement (BPA)

THE GOVINI ECOSYSTEM: REMOVING THE DATA-ASSEMBLY BOTTLENECK

GSA Schedule Procurement: Software Subscriptions

Contract Number: 47QTCA23D0063 (GSA MAS - Information Technology Category)

Base Ark.ai

\$15,113.35

per seat/subscription

(Available via scaling formula:
up to 100 Base licenses per 75
Team licenses purchased).

Team Ark.ai

\$151,133.50

per seat/subscription

Unlocks Application Hubs for
program-specific insights,
white-glove configuration, and
guided workflows.

Pilot Ark.ai

\$151,133.50

per seat

Available for \$18M+
enterprise engagements.

Ark Supply Chain Application: \$136,020.15 per seat/subscription.

Dedicated module for SCRM workflows.

GSA Schedule Procurement: Professional Services Support

Category: Strategic Leadership (Directors)	Price Band: \$282 - \$413 / hr	Details: Includes Program/Project Directors and the Defense Innovation Director (requires Master's + 12 yrs, provides Senior Executive experience and commercial tech translation for national security).
Category: Expert Consultants (SMEs & Consultants)	Govini Amber: \$241 - \$282 / hr	Details: Includes Senior Functional SMEs. Provides advanced technical analysis of highly specialized applications and operational environments.
Category: Tactical Execution (Analysts & Specialists)	Govini Amber: \$181 - \$282 / hr	Details: Includes Data, Systems, Process, and Business Analysts. Executes exploratory data analyses, configuration management, and predictive modeling.

The Govini Certification Program

Supply Chain Risk Management (SCRM)

Encompasses statutory requirements, analytical skill sets, and decision science to achieve tactical implementation at scale.

Structure

16 hours

(Four half-day sessions)

Cohort Sizing

5 - 20

participants
minimum/maximum

GSA Price

\$1,511.34

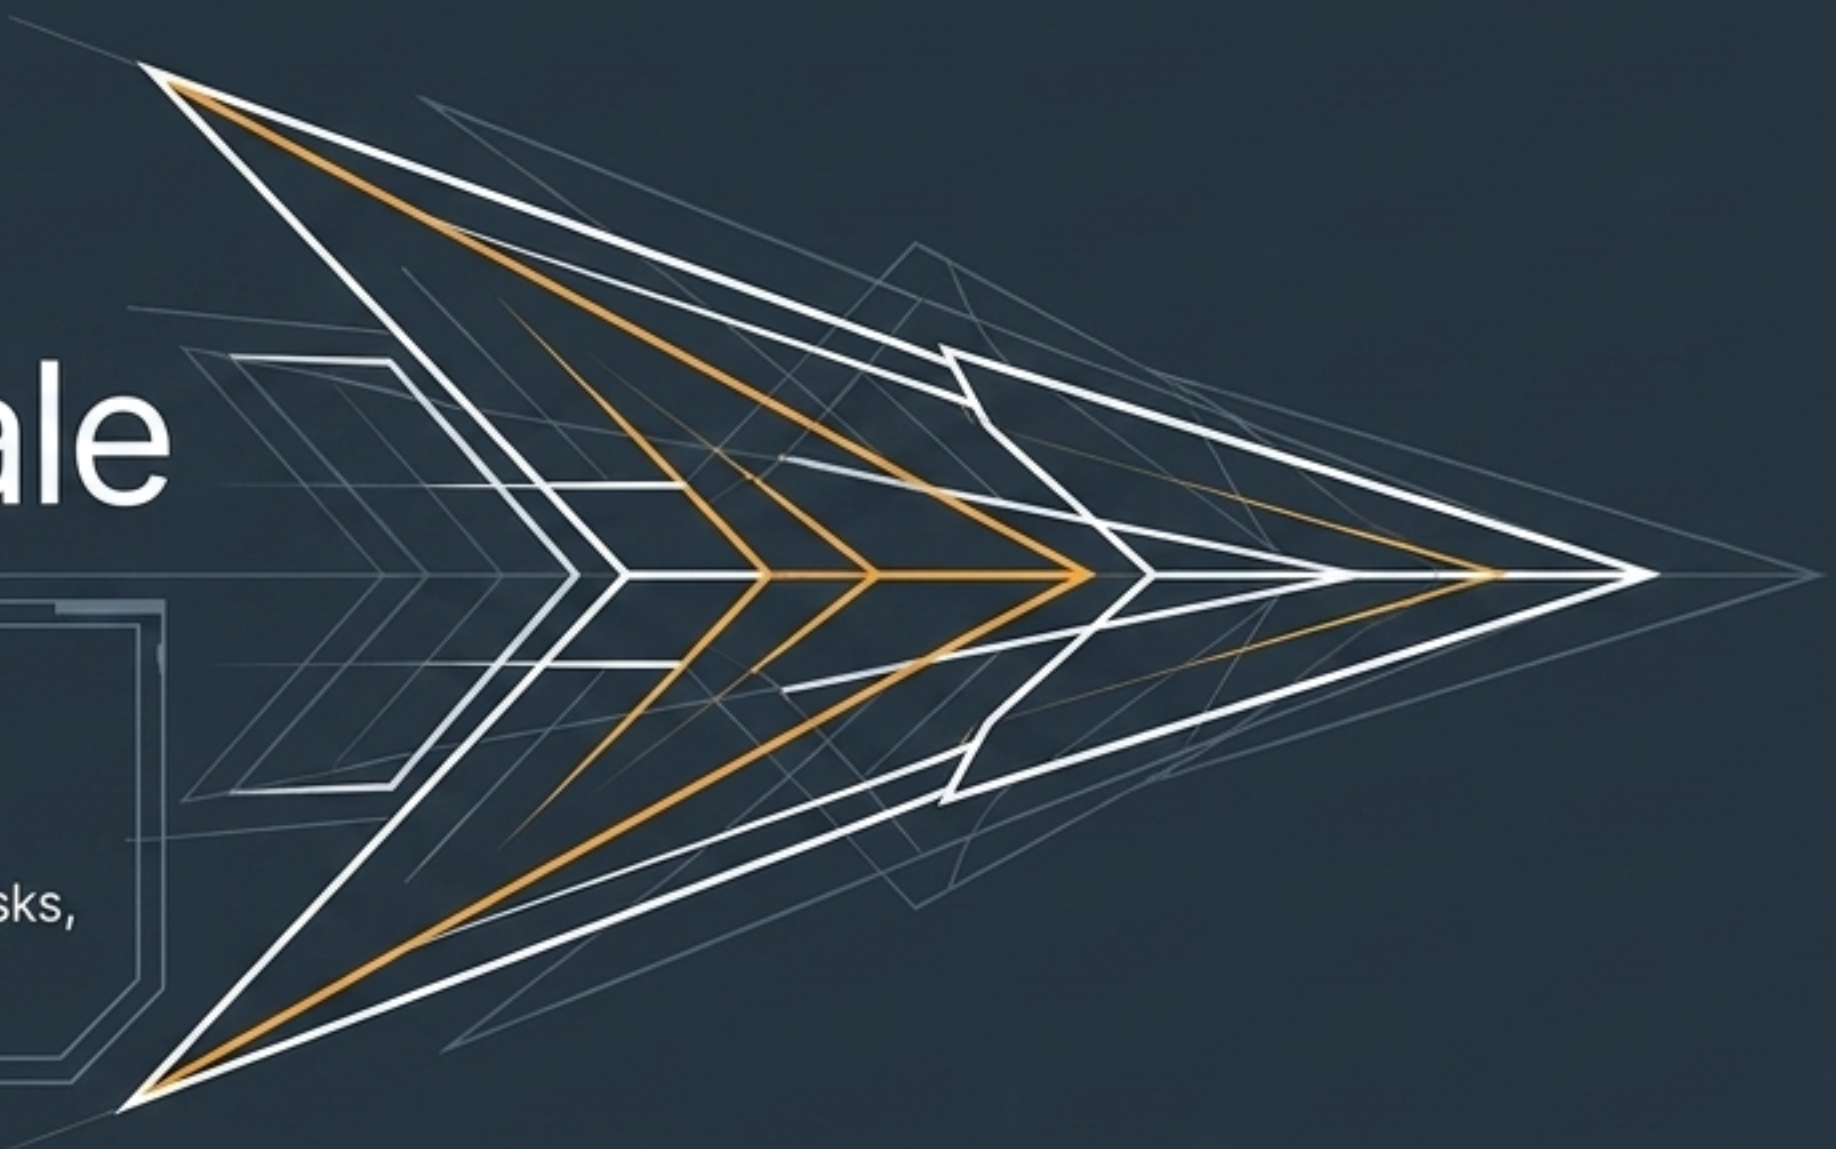

per participant

Scale Incentive

50% Discount

per participant if a single
office/program registers a
full 20-person cohort.

Execution at Speed and Scale

- Legacy processes aren't just slow; they are a strategic vulnerability.
- Ark provides the intelligence layer necessary to eliminate manual bottlenecks, illuminate hidden risks, and rapidly field critical warfighting capabilities.

**Transform Defense Acquisition
into a strategic advantage.**
